

JUDE ANANDARAJ

Toronto, ON | 437-249-1217 | gerryn.017@gmail.com | [LinkedIn](#) | [Portfolio](#)

JUNIOR GAME DEVELOPER

Game Design | Gameplay Systems | 3D Asset Development

HIGHLIGHTS OF QUALIFICATIONS

- Creative Game Programming student with hands-on experience building interactive 2D/3D gameplay and user-focused game systems in Unity.
- Skilled in C#, Java, Python, JavaScript, SQL, HTML, and CSS, with a strong foundation in object-oriented and event-driven programming.
- Built Unity systems using CharacterController, Rigidbody, Animator, NavMeshAgent, Canvas, TextMeshPro, physics, player interaction, timers, scoring, and UI.
- Developed game-ready 3D assets in Blender using modeling, UV mapping, materials, smooth shading, Shader Editor workflows, and Blender Python scripting.
- Strong problem-solving, creativity, debugging, troubleshooting, testing/QA, and attention to detail across game and software development projects.
- Experienced in using AI-assisted development workflows to support game design, programming, debugging, problem solving, and 3D game-development tasks.

TECHNICAL SKILLS

Programming: C# | Java | Python | JavaScript | SQL | HTML | CSS

Game Development: Unity | C# Gameplay Programming | Animator | NavMesh | Character Controller | Rigidbody | Unity UI | TextMeshPro

3D & Assets: Blender | Blender Python | 3D Modeling | UV Mapping | Materials | Game Asset Integration

Development Tools: Visual Studio | Visual Studio Code | Unity Hub | Oracle SQL Developer | Git | Linux

Concepts: Object-Oriented Programming | Debugging | Testing & QA | SDLC | Software Requirements | Database Design | UI Development

AI-Assisted Development: AI-Assisted Coding | Debugging & Problem Solving | Game Design Ideation | Development Support | AI-Assisted 3D/Content Workflows

EDUCATION

Game – Programming (Co-op) Advanced Diploma | Jan 2026 – Dec 2028

Centennial College, Toronto, ON

Relevant Courses: C# Programming | 2D Games with Unity & C# | Assets for Game Developers | Programming I | Database Concepts (SQL) | Testing & QA

PROJECTS

No Way Out – Escape Room Game | Unity, C#, Blender | Jan 2026 – Apr 2026

Academic Project

Centennial College, Toronto, ON

- Developed a first-person, five-level escape-room game featuring puzzles, exploration, parkour, a 10-minute timed challenge, and player interaction systems.
- Implemented walking, running, crouching, prone movement, jumping, gravity, interaction, health, lives, ammunition, pickups, timers, scoring, menus, and UI.
- Designed progression using access cards, code puzzles, object interactions, level objectives, and custom Blender assets integrated into Unity.

3D Game Asset Development | Blender, Python, Unity | May 2026 – Aug 2026
Centennial College, Toronto, ON

Academic Project

- Created procedural and manually modeled game assets using Blender and Blender Python scripting.
- Applied mesh editing, bevels, materials, UV mapping, smooth shading, and Shader Editor workflows to prepare organized game-ready assets.
- Prepared custom 3D assets for integration into Unity game environments.

RELEVANT GAME DEVELOPMENT EXPERIENCE

- Built and iterated on Unity gameplay using C# scripts, prefabs, physics, animation, navigation, UI, and player-controller systems.
- Worked with CharacterController, Rigidbody, NavMeshAgent, Animator, Canvas, Slider, TextMeshProUGUI, and other Unity components.
- Designed timed gameplay systems with objectives, lives, scoring, retry-oriented game flow, pickups, menus, and player feedback.
- Troubleshoot programming, Unity, Blender, Linux, Apache, and development-environment issues using structured debugging and testing.

RELEVANT ACADEMIC EXPERIENCE

- Completed programming coursework involving classes, objects, methods, loops, object-oriented design, event-driven programming, and software development practices.
- Completed database coursework involving relational database concepts, SQL commands, queries, tables, filtering, sorting, and data management.
- Completed game-development and asset-development coursework involving Unity, C#, Blender, 2D/3D assets, testing, and game integration.

ADDITIONAL STRENGTHS & INTERESTS

- Soft Skills: Creativity | Problem Solving | Attention to Detail | Adaptability
- Game Development: Interested in realistic, cinematic, interactive games with strong gameplay systems, environments, puzzles, and player experience.

CAREER OBJECTIVE

Seeking a co-op, internship, or junior Game Programming/Game Development opportunity where I can apply Unity, C#, gameplay programming, AI-assisted development, 3D asset development, debugging, and problem-solving skills while continuing to grow professionally.
