

JUDE ANANDARAJ

Toronto, ON | 437-249-1217 | gerryn.017@gmail.com | [LinkedIn](#) | [Portfolio](#)

JUNIOR GAME DEVELOPER

Game Design | Gameplay Systems | 3D Asset Development

HIGHLIGHTS OF QUALIFICATIONS

- A creative student of software engineering, specializing in Game Programming
- Skilled in C#, Java, Python, JavaScript, SQL, HTML, and CSS, with a strong foundation in core concepts: object-oriented, event-driven programming, SDLC, Agile practices, and user-oriented design
- Strong problem-solving, debugging, troubleshooting, testing/QA, and attention to detail across projects
- Experienced in using AI-assisted development workflows to support design, programming, debugging, problem solving, and 3D development tasks
- Hands-on experience building interactive 2D/3D gameplay and user-focused game systems in Unity
- Built Unity systems using CharacterController, Rigidbody, Animator, NavMeshAgent, Canvas, TextMeshPro, physics, player interaction, timers, scoring, and UI
- Developed game-ready 3D assets in Blender using modeling, UV mapping, materials, smooth shading, Shader Editor workflows, and Blender Python scripting

TECHNICAL SKILLS

Programming: C# | Java | Python | JavaScript | SQL | HTML | CSS

Game Development: Unity | C# Gameplay Programming | Animator | NavMesh | Character Controller | Rigidbody | Unity UI | TextMeshPro

3D & Assets: Blender | Blender Python | 3D Modeling | UV Mapping | Materials | Game Asset Integration

Development Tools: Visual Studio | Visual Studio Code | Unity Hub | Oracle SQL Developer | Git | Linux

Concepts: Object-Oriented Programming | Debugging | Testing & QA | SDLC | Software Requirements | Database Design | UI Development

AI-Assisted Development: AI-Assisted Coding | Debugging & Problem Solving | Game Design Ideation | Development Support | AI-Assisted 3D/Content Workflows

EDUCATION

Game Programming (Co-op) Advanced Diploma

Jan 2026 - Dec 2028

Centennial College, Toronto, ON

Relevant Courses: C# Programming | Web Application Development | Web Interface Design | 2D Games with Unity & C# | Assets for Game Developers | Database Concepts (SQL) | Testing & QA | Unix/Linux OS

Core Competencies:

- Learn objects, methods, loops, OOP, event-driven programming, and software development practices
- Focus on relational database, SQL commands, queries, tables, filtering, sorting, data management
- Troubleshot programming, Unity, Blender, Linux, Apache, and development-environment issues using structured debugging and testing
- Complete game-development and asset-development with Unity, C#, Blender, 2D/3D assets, testing, and game integration
- Built and iterated on Unity gameplay using C# scripts, prefabs, physics, animation, navigation, UI, and player-controller systems
- Worked with CharacterController, Rigidbody, NavMeshAgent, Animator, Canvas, Slider, TextMeshProUGUI, and other Unity components

-
- Designed timed gameplay systems with objectives, lives, scoring, retry-oriented game flow, pickups, menus, and player feedback

SELECT PROJECTS

No Way Out - Escape Room Game | Unity, C#, Blender

- Developed a first-person, five-level escape-room game featuring puzzles, exploration, parkour, a 10-minute timed challenge, and player interaction systems
- Implemented walking, running, crouching, prone movement, jumping, gravity, interaction, health, lives, ammunition, pickups, timers, scoring, menus, and UI
- Designed progression using access cards, code puzzles, object interactions, level objectives, and custom Blender assets integrated into Unity

3D Game Asset Development | Blender, Python, Unity

- Created procedural and manually modeled game assets using Blender and Blender Python scripting
- Applied mesh editing, bevels, materials, UV mapping, smooth shading, and Shader Editor workflows to prepare organized game-ready assets
- Prepared custom 3D assets for integration into Unity game environments.

INTERESTS

Game Development: Interested in realistic, cinematic, interactive games with strong gameplay systems, environments, puzzles, and focus on player experience. Enjoys the game experiences both as a leisure player and developer.
